SUSTAINABILITY IN SS22 COLLECTION

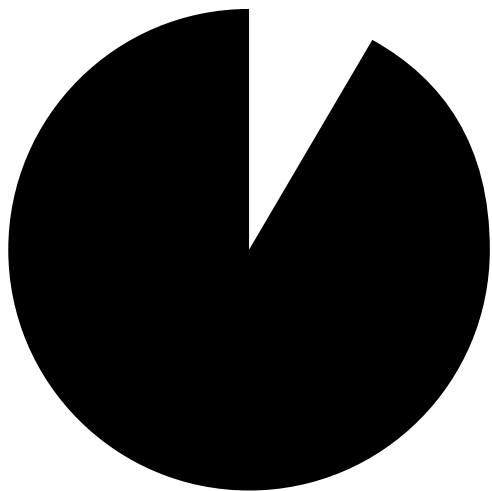

83% of garments in the collec-
tion are COMMITMENT

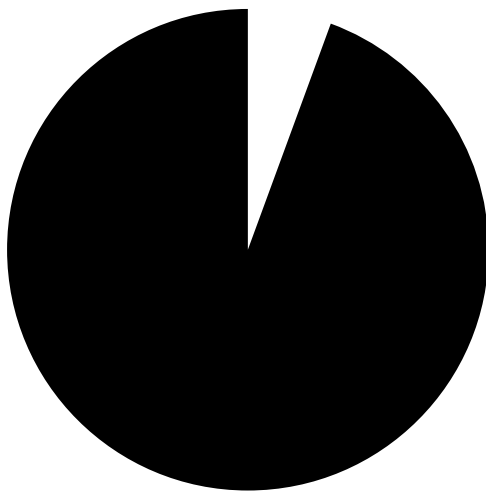

69% of the cotton garments are
made with recycled or organic
cotton.

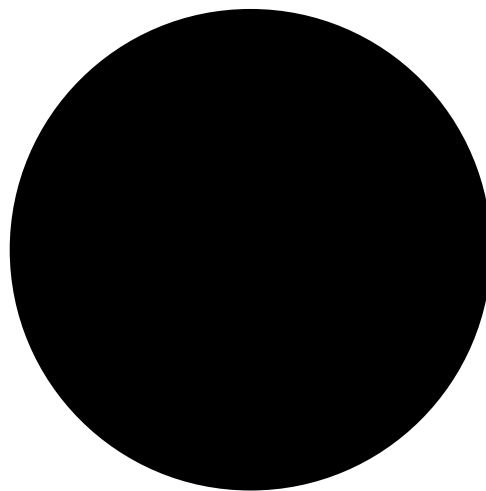

60% of the wool garments are
made with recycled or RWS wool.

80% of the polyester garments
are made with recycled or
Bluesign® certified polyester.

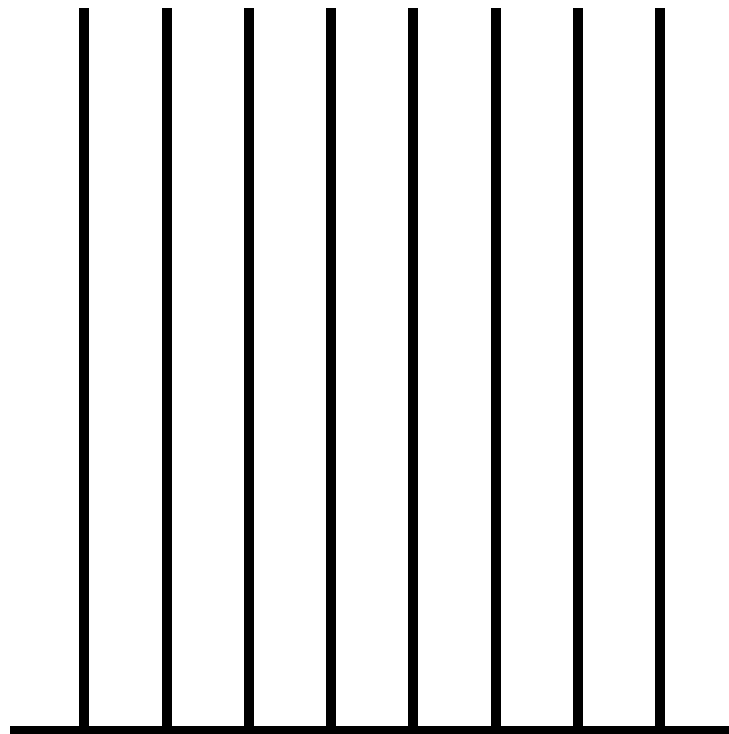

83% of the polyamide garments
are made with recycled or
Bluesign® certified polyamide.

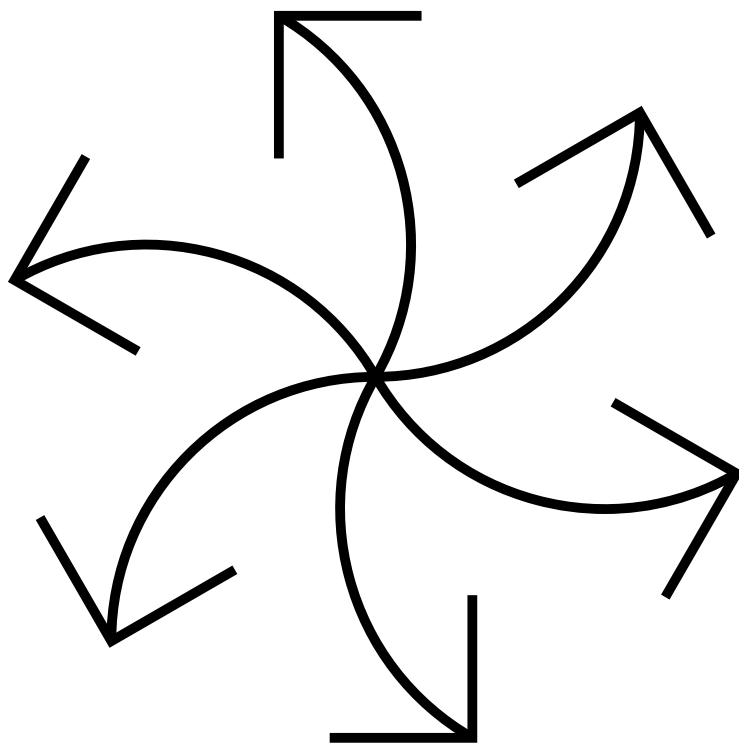

100% of the water repellency
treatments (DWR) are C-0, PFC
free.

SUSTAINABILITY

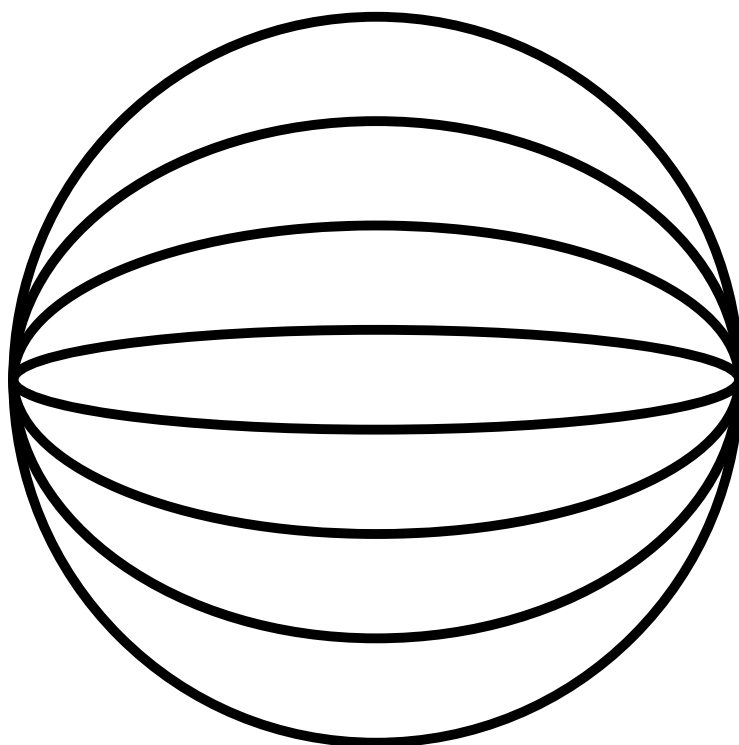

PCF FREE DWR

Water resistance treatment (DWR) free of perfluorocarbons, mainly applied to fabrics.

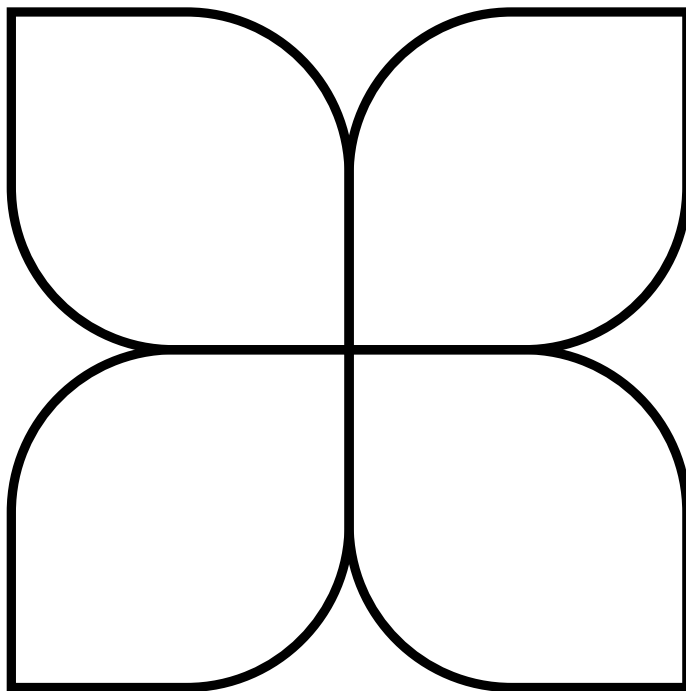

RECYCLED

Textiles are processed to give garments a second life and to reduce their impact on the environment.

ORGANIC COTTON

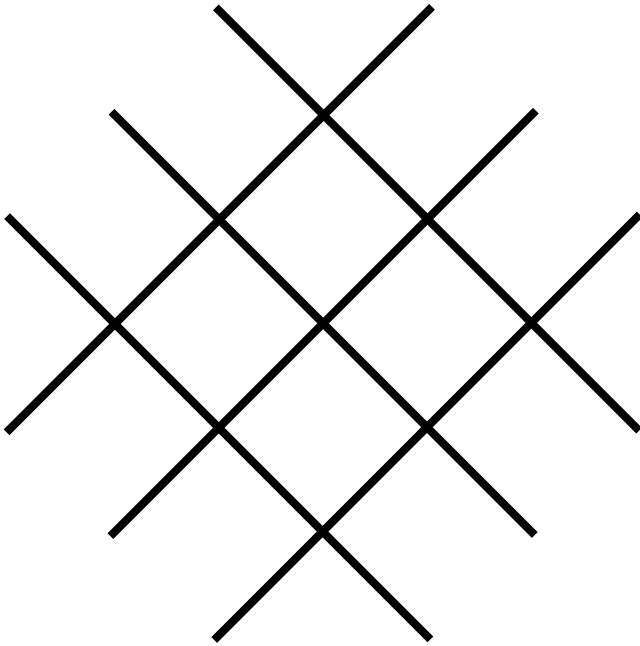

It is a natural fiber grown without using pesticides and synthetic fertilizers, in a sustainable way. It prevents contamination of the soil and it is not harmful for the farmers' health.

COMMITMENT

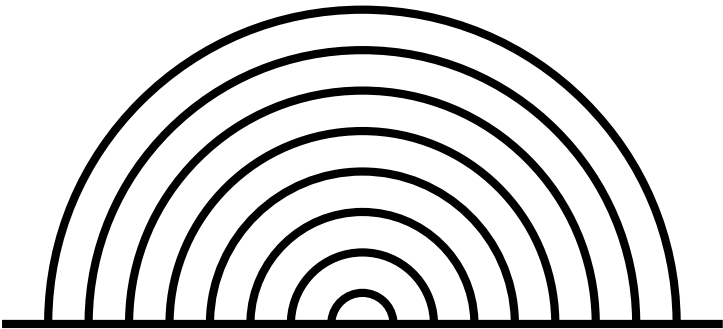

The Ternua Group's COMMITMENT label identifies products that comply with the company's responsibility with the sustainable origin of the materials and treatments we use.

SINGULAR PROJECTS

REDCYCLE

Made with fabric from disused fishing nets.

WEARCYCLE

Made with fabric from post-consumer textile waste.

OWN TECHNOLOGY

It is a bi-elastic fabric that stands out for its high resistance, comfort and adaptation to the body, always keeping its shape.

NON OWN TECHNOLOGY

A vibrant blend of Recover™ recycled cotton and recycled polyester. High quality and low-impact fiber products.

SUSTAINABILITY CERTIFICATES

ECOVERO TM fibers are produced from cellulose obtained from renewable wood resources as raw materials. Lenzing purchases wood and cellulose from responsibly managed, and certifications prove that the material is obtained from sustainable sources.

Guarantees that certified fabrics do not contain chemicals harmful to the health of the people who manufacture or use them and to the environment.

Guarantees that fabrics approved meet requirements still stricter and more extensive with regarding chemicals used in the production of our materials. This supposes greater security for the production process, the medium environment and consumers.
