SUSTAINABILITY AND TECHNOLOGY

LOREAK MENDIAN

Committed to the planet, committed to people, committed to the durability of our garments. Because we want to make your day-to-day life more comfortable, your clothing more functional and the environment more cared for. At Loreak Mending sustainability is the result of ingenuity, that's why we apply new technologies to develop our timeless garments with the best quality. A collection that stands out thanks to its designs made with waterproof, breathable fabrics that protect against the cold and wind, and eliminate bad odours.

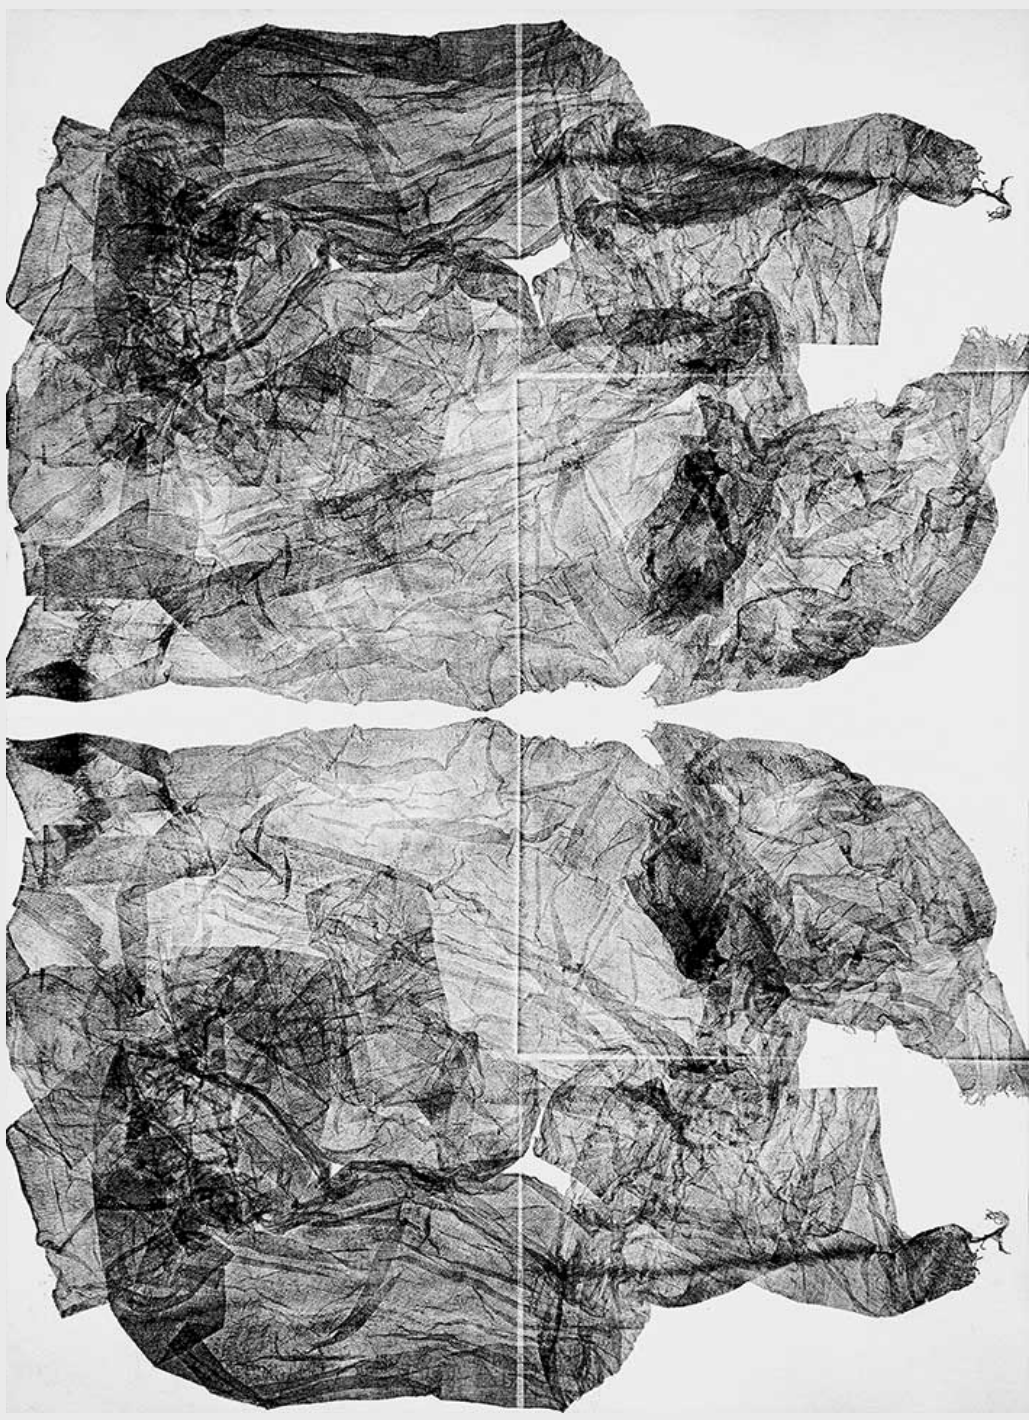

At Loreak Mending we are committed to ethical fashion and that's why this season we include both recycled down and wool in our garments, in addition to responsible practices for making clothes. Thanks to this, the entire FW21 collection is 74% sustainable and its EDGE Apparel Series is 100%.

Loreak Mending means dressing with a commitment to sustainability, using technological innovation and putting it at the service of creativity to transform how we dress and also how we consume.

**COMMITTED

FABRIC TECHNOLOGY

SUSTAINABILITY

ORGANIC COTTON

It does not pollute the land, nor is it harmful to the health of those who cultivate and handle it.

RECYCLED FABRICS

Textiles are processed to give garments a second life and to reduce their impact on the environment.

COMMITMENT

OEKO-TEX (Standard 100)

Textiles that have been tested to control and avoid any harmful substances.

PFC FREE

This garment doesn't contain any fluorochemicals, it is free from any toxic element.

BLUE SIGN

This standard for environmental health and safety in the manufacturing of textiles, certifies a sustainable production.

TECHNOLOGY

LAVALAN WOOL

Aislante de lana realizado en 100% fibras naturales. Absorbe y libera el vapor de la humedad y al mismo tiempo repele el agua. Muy transpirable, de secado rápido y mantiene el calor. Neutraliza los olores. Obtenida en países europeos, con los más altos estándares de calidad y bienestar animal. Renovables, reciclable y biodegradable.

NEOKDUN

Relleno de plumón respetuoso con el medio ambiente y 100% reciclado. Natural y biodegradable, Neokdun® procede del reciclaje de productos finalizados como ropa de cama y prendas, que han llegado al final de su vida útil. El plumón se extrae manualmente de los productos terminados y se recoge en Europa, siempre controlado por la Regulación de la Trazabilidad (NVP).

OWN TECHNOLOGY

MICROSHELL

BREATHABLE The water vapour passes rapidly through the fabric and is taken away from the body. WINDPROOF Completely blocks the wind.

PFC-FREE DWR PFC-free water-repellent treatment.

LIGHTWEIGHT is technologically developed based on ultra-fine synthetic microfibers, which makes it a lightweight.

SHELLTEC

WATERPROOF it provides total waterproofness thanks to its membrane (10,000 mm water column). BREATHABLE The water vapour passes rapidly through the fabric and is taken away from the body. (Water-vapour permeability 10,000 g m²/24h).

WINDPROOF completely blocks the wind.

PFC-FREE DWR pfc-free water-repellent treatment. Very hard-wearing this fabric is VERY HARD-WEARING, perfect for activities when bad weather demands high exterior protection.

WARMSHELL

THERMAL REGULATOR Impedes heat loss, the body remains warm and protected.

BREATHABLE The water vapour passes rapidly through the fabric and is taken away from the body.

QUICK DRYING Technologically developed to extract and transfer the sweat to the outside for quick drying.

WINDHSELL

THERMAL REGULATOR impedes heat loss, the body remains warm and protected.

WATER RESISTANT it provides water resistance thanks to its membrane (10,000 mm water column).

BREATHABLE the water vapour passes rapidly through the fabric and is taken away from the body.

(Water-vapour permeability 10,000 g/m²/24h).

WINDPROOF completely blocks the wind.

PFC-FREE DWR pfc-free water-repellent treatment.
