COMMITMENT (S27 COLLECTION)

On average, more than 80% of the impact of a product (textile and accessories) is due to the materials with which it is manufactured.

Therefore, the selection of materials and accessories for each product is an essential part of the TERNUA GROUP environmental strategy. The goal? Hard-wearing and high-performance products which, above all, are harmless to people and the environment.

In 2007, we introduced an internal sustainable design standard called COMMITMENT that allows us to guide and support the progress of our teams in product development and that is now used by all brands in the group.

The product development teams of each brand are completely in line with each other and continuously work to improve and extend this commitment.

PFC FREE (PERFLUOROCARBON COLLECTION)

Water resistance treatment (DWR) free of perfluorocarbons, mainly applied to fabrics.

Rec

Textiles are processed to give garments a second life and to reduce their impact on the environment.

Guarantees that fabrics approved meet requirements still stricter and more extensive with regarding chemicals used in the production of our materials. This supposes greater security for the production process, the medium environment and consumers.

Organic Cotton

(SS23 COLLECTION)

It is a natural fiber grown without using pesticides and synthetic fertilizers, in a sustainable way. It prevents contamination of the soil and it is not harmful for the farmers' health.

Oeko-Tex (SS23 COLLECTION)

(I N N O V A T I O N)

Guarantees that certified fabrics do not contain chemicals harmful to the health of the people who manufacture or use them and to the environment.

Our Sustainable Yarns bring color to life, so you use our products to create a more beautiful world both inside and out. Because you will be part of the ECOLIFE movement, responsible, conscious and respectful; but also creative, colorful and full of energy.

We are part of a cycle of life, stories, emotions and experiences; but especially people. We want your customers to like the way they look and feel in our products.

We believe that respect for the environment, good company management and social commitment are, above all, respect for your family and ours.

Technologies

Windshell

(2022 COLLECTION)

THERMOREGULATING Prevents heat loss, the body stays warm and protected.

WATER RESISTANT Provides high water resistance thanks to its membrane (10,000 mm water column).

BREATHABLE Moisture vapor quickly passes through the fabric away from the body. (Vapor permeability 10,000 grs/m²/24h).

WINDBREAKING Completely blocks the wind.

PFC FREE DWR PFC-free water repellent treatment.

WINDSHELL

Microshell

(SS23 COLLECTION)

BREATHABLE Moisture vapor quickly passes through the fabric away from the body. **WINDPROOF** Completely blocks wind.

PFC FREE DWR PFC-free water repellent treatment.

ULTRALIGHT FABRIC is technologically developed based on ultrafine synthetic microfibers, making it an ultra-lightweight fabric.

MICROSHELL

Shellstretch

(\$23 COLLECTION)

I N N O V A T I O N

Shellstretch fabric is bi-elastic for improved body adaptation, always keeping its shape as well as being hard-wearing and comfortable.

Designed to quickly absorb perspiration and transport moisture away from the body, it also has a water-repellent finish. Shellstretch fabric is ideal for activities requiring total freedom of movement. This makes it ideal for mountain sports requiring total freedom of movement.

COLLECTION)

The garments under the Redcycle project contain 100% recycled nylon from fishing nets resulting from the SARETU collaborative project, based on collecting in the port of Seychelles the nets discarded by Basque tuna fishing boats operating in the Indian Ocean, providing a circular economy solution to the problem of discarded fishing gear.

Wearcycle

(19823 I N N O V A T I O N COLLECTION)

Wearcycle is a project that transforms post-consumer textile waste into timeless and durable garments. Our penchant for design and honest fashion has led us to collect garments that are at the end of their life cycle for the production of recycled yarn to make new products. The aim is to use damaged clothes from laundries and make recycled yarn. recycled yarn. A project based on the principle of circular economy with which we create functional and quality garments.
