COMMITMENT

En promedio, más del 80% del impacto de un producto (textil y complemento) es por los materiales con los que está fabricado.

Por ello, la selección de los materiales y accesorios para cada producto es una parte esencial de la estrategia ambiental de TERNUA GROUP. ¿El objetivo? Productos duraderos y de alto rendimiento, pero que ante todo sean inofensivos para las personas y el medio ambiente.

En 2007, introdujimos un estándar interno de diseño sostenible que nos permite guiar y respaldar el progreso de nuestros equipos en el desarrollo de los productos llamado COMMITMENT y que ahora es utilizado por todas las marcas del grupo.

Los equipos de desarrollo de producto de cada marca, están completamente alineados y trabajan continuamente para mejorar y desarrollar este compromiso.

On average, more than 80% of the impact of a product (textile and accessories) is due to the materials with which it is manufactured.

Therefore, the selection of materials and accessories for each product is an essential part of the TERNUA GROUP environmental strategy. The goal? Hard-wearing and high-performance products which, above all, are harmless to people and the environment.

In 2007, we introduced an internal sustainable design standard called COMMITMENT that allows us to guide and support the progress of our teams in product development and that is now used by all brands in the group.

The product development teams of each brand are completely in line with each other and continuously work to improve and extend this commitment.

En moyenne, plus de 80% de l’impact d’un produit (textile et accessoires) est dû aux matières qui le composent.

La sélection des matières et des accessoires pour chaque produit est donc un élément essentiel de la stratégie environnementale du groupe TERNUA. L’objectif ? Des produits durables, performants et, surtout, inoffensifs pour l’homme et l’environnement.

En 2007, nous avons introduit une norme interne de conception durable pour guider et soutenir les progrès de nos équipes dans le développement de produits, appelée COMMITMENT, qui est maintenant utilisée par toutes les marques du groupe.

Les équipes de développement de produits de chaque marque sont totalement alignées et travaillent en permanence pour améliorer et développer cet engagement.

NEOKDUN

- (ESP)

Las plumas y el plumón reciclados proceden de ropa de cama y de prendas ya utilizadas, que han llegado al final de su vida útil. Normalmente, el relleno de plumón y de plumas cuenta con un periodo de vida útil más largo que los propios productos terminados. Por lo tanto, se extrae el relleno de plumas y de plumón de dichos productos. El material de plumas y plumón de relleno se clasifica y se procesa para cumplir con los estándares de limpieza y otros requisitos de rendimiento. En ese momento, el plumón y las plumas reciclados se pueden utilizar para rellenar de nuevo otros productos terminados.

El plumón y las plumas reciclados denominados NEOKDUN deben someterse a un proceso innovador para obtener el máximo nivel de limpieza y el mejor rendimiento como relleno nuevo para los productos terminados.

El proceso es respetuoso con el medio ambiente y no utiliza productos químicos perniciosos.

La regulación de la trazabilidad NVP es la base para demostrar el origen del plumón y de las plumas reciclados NEOKDUN.

- (ENG)

Recycled down and feathers come from used bedding and garments that have reached the end of their useful life. Normally, down and feather fillings have a longer shelf life than the finished products themselves. Therefore, feather and down fillings are extracted from these products. The feather and down filler material is sorted and processed to meet cleanliness standards and other performance requirements. The recycled down and feathers can then be used to refill other finished products.

NEOKDUN recycled down and feathers must undergo an innovative process to achieve the highest level of cleanliness and best performance as a new filler for finished products.

The process is environmentally friendly and does not use harmful chemicals.

The NVP traceability regulation is the basis for proving the origin of NEOKDUN recycled down and feathers.

Les plumes et le duvet recyclés proviennent de linge de lit et de vêtements déjà utilisés, qui sont arrivés à la fin de leur durée de vie utile. Normalement, le rembourrage en duvet et en plumes présente une durée de vie utile plus longue que les propres produits finis. On procède donc à l'extraction du rembourrage en plumes et en duvet de ces produits. Le matériau des plumes et du duvet de rembourrage est trié et traité pour respecter les normes de propreté et d'autres exigences de performance. A cette étape, le duvet et les plumes recyclés peuvent être utilisés pour remplir à nouveau des produits finis.

Le duvet et les plumes recyclés appelés NEOKDUN doivent être soumis à un processus innovant pour obtenir le niveau de propreté optimal et la meilleure performance comme nouveau rembourrage pour les produits finis.

Le processus est respectueux de l'environnement et n'utilise pas de produits chimiques nocifs.

La réglementation de la traçabilité NVP est la base pour démontrer l'origine du duvet et des plumes recyclés NEOKDUN.

LAVALAN

(ESP) Nuestra lana proviene exclusivamente de ovejas de Europa. Pastan en los idílicos paisajes de los Alpes austriacos y suizos o viven en entornos naturales de las vastas praderas noruegas y suecas. Disfrutan de la naturaleza pura y diversa, el agua limpia y la hierba fresca. A pesar de que en las montañas o en el duro clima escandinavo las temperaturas pueden oscilar entre las cifras negativas durante la noche y los 30 °C durante el día, la lana mantiene a las ovejas a salvo de los elementos, frescas cuando hace calor y protegidas frente al frío. Nuestra cadena de suministro está certificada por la compañía independiente suiza EGOTRACE, de forma que podemos garantizar el origen de nuestra lana desde el animal hasta el producto terminado, fieles al eslogan from sheep to shop (de la oveja a la tienda). Así, los compradores escépticos pueden rastrear el recorrido de la lana hasta el punto de recogida –lo que nos llena de orgullo–. Las ovejas se crían para lana y deben esquilarse para mantener sus buenas condiciones sanitarias e higiénicas, ya que, al contrario que otras especies, la mayoría de las ovejas no pueden mudar el pelo. Por eso, si no se corta, el exceso de lana podría provocar un exceso de calor y enfermedades. El mulesing, una práctica utilizada en el hemisferio sur para evitar las infecciones por moscas (flystrike), no se realiza en Europa, por lo que podemos afirmar que nuestra lana europea está totalmente libre de mulesing. Para nosotros es esencial que las ovejas no sufran ningún tipo de tortura durante la cría o el esquilado.

(ENG) Our wool comes exclusively from sheep in Europe. They graze in the idyllic landscapes of the Austrian and Swiss Alps or live in the natural surroundings of the vast Norwegian and Swedish meadows. They enjoy pure and diverse nature, clean water and fresh grass. Although temperatures in the mountains or in the harsh Scandinavian climate can range from minus 30 °C at night to minus 30 °C during the day, wool keeps sheep safe from the elements, cool in hot weather and protected from the cold. Our supply chain is certified by the independent Swiss company EGOTRACE, so we can guarantee the origin of our wool from animal to finished product, true to the slogan from sheep to shop. Skeptical buyers can thus trace the wool's journey to the point of collection – which we are very proud of. Sheep are bred for wool and must be sheared to maintain good sanitary and hygienic conditions because, unlike other species, most sheep cannot shed their hair. Therefore, if left unshorn, excess wool could lead to overheating and disease. Mulesing, a practice used in the southern hemisphere to prevent flystrike, is not done in Europe, so we can claim that our European wool is totally free of mulesing. For us it is essential that the sheep do not suffer any kind of torture during breeding or shearing.

(FR) Notre laine provient exclusivement de moutons de toute l'Europe. Ils paissent dans le cadre idyllique des Alpes autrichiennes et suisses, ou bien ils sont maintenus dans des conditions naturelles sur de vastes pâturages en Norvège et en Suède. Nos moutons ont toujours accès à une nature pure et diversifiée, de l'eau propre et un pâturage florissant. Même si les températures en montagne ou sous le rude climat scandinave peuvent varier de températures négatives la nuit à 30 °C le jour, leur fourrure les protège contre les éléments, les gardant au frais lorsqu'il fait chaud et leur assurant une chaleur agréable quand il fait froid. Conformément à la devise << du mouton au magasin >>, l'entreprise suisse indépendante EGOTRACE certifie notre chaîne d'approvisionnement, afin que nous puissions prouver l'origine de notre laine du mouton au produit fini. Cela permet à des consommateurs critiques de suivre la laine jusqu'au point de collecte, ce dont nous sommes le plus fiers. Les moutons ont été élevés pour faire pousser la laine et la tonte doit être pratiquée pour la santé et l'hygiène de chaque animal. Contrairement à d'autres animaux, la plupart des moutons sont incapables de muer. Cela peut rendre le mouton surexcité et en mauvaise santé. Le mulesing, qui est généralement requis dans l'hémisphère sud pour éviter la transmission de la myase, n'est pas pratiqué en Europe. Par conséquent, nous affirmons que notre laine européenne est entièrement mulesing-free. Il est crucial pour nous qu'aucun mouton ne soit torturé, ni pendant l'allaitement, ni pendant le processus de tonte.
